Data control in unisono

Dear students,

It is absolutely important to check your data in unisono before you end your studies to enable us to issue correct certificates. In case of data amendments you have to contact the International Student Affairs Office SSC – please note that we cannot do this for you!

In the past some students informed us that the data in unisono was not correct so that we had to issue a new certificate. This causes evitable inconvenience to every person involved in this matter (to the head of the examination office and to the dean as well) and means a long waiting period for you.

Thanks in advance!

Kind regards

On behalf Natalia Berg
