

Ground-air robot cooperation for object recognition in realtime

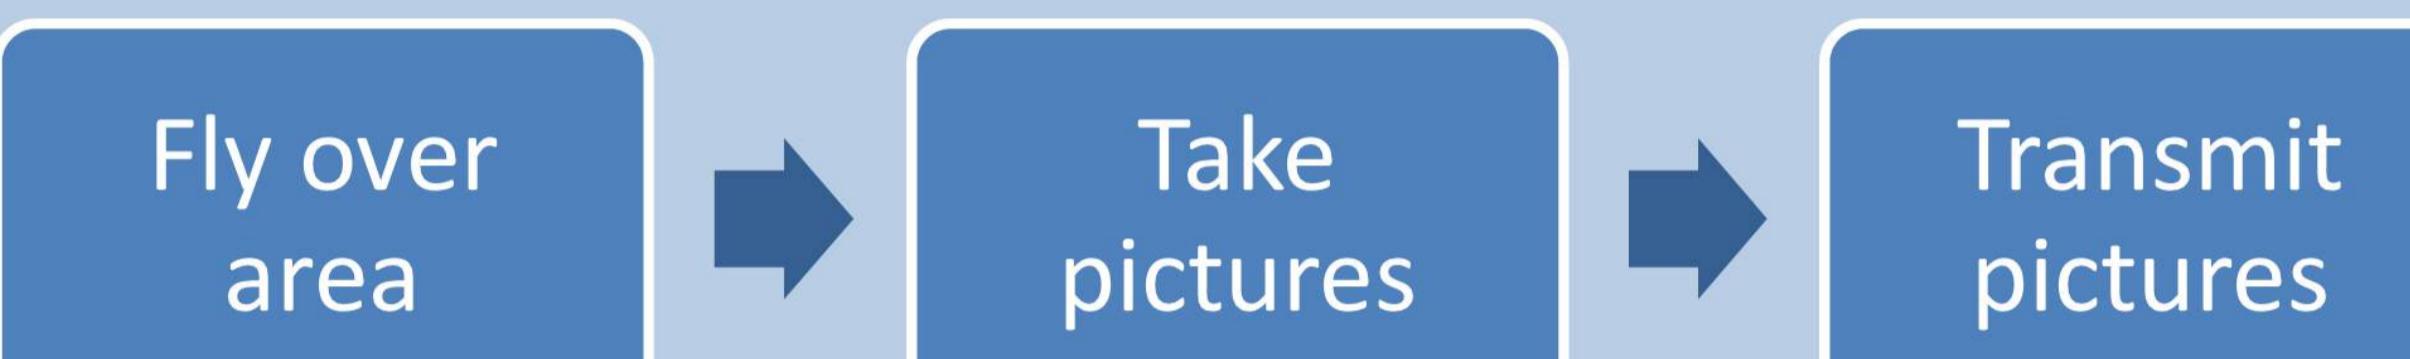

System overview

Air-robot:

- Autonomous quadrocopter
- high resolution camera
- flight time up to 45 minutes

PSYCHE: Search objects

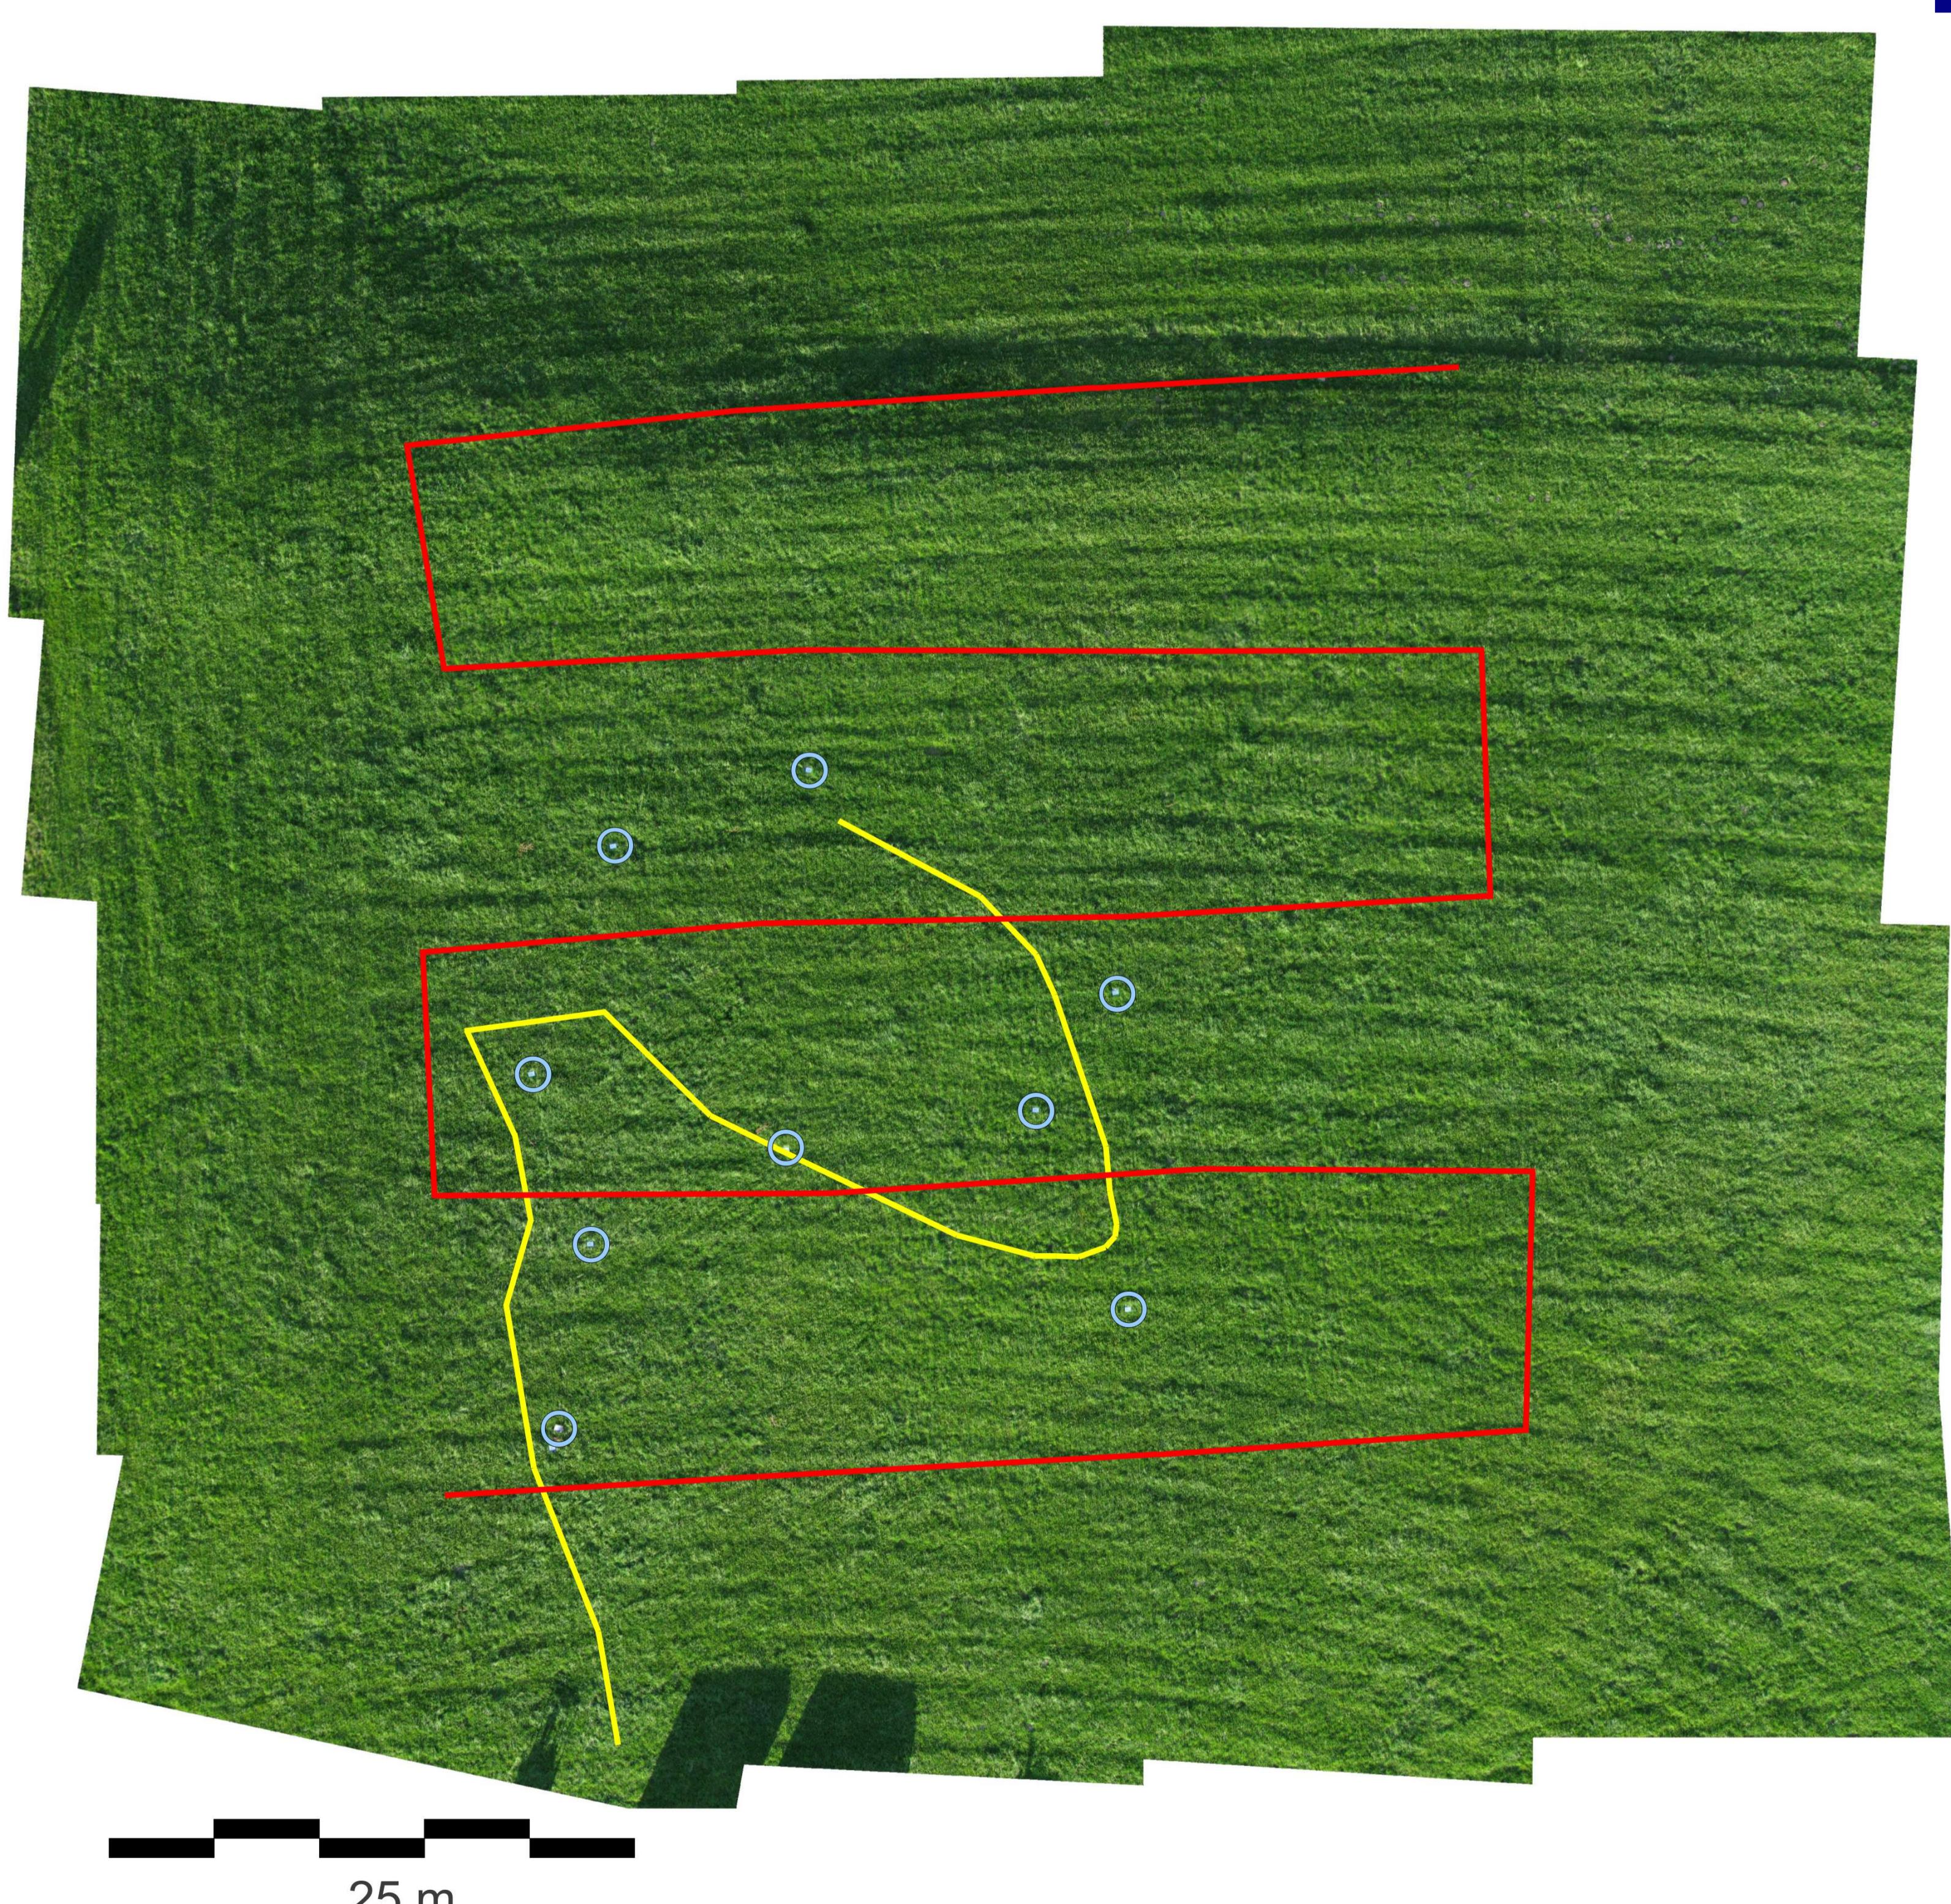

Ground-robot:

- Up to 100 kg payload
- autonomous ATV 4WD

AMOR: Approach objects

Properties:

- Automatic georeferenced map generation without ground control points
- high resolution imagery up to 3.3mm/Pixel

Applications

- **autonomous weed-detection and -application**
- **fawn search**
- **obstacle detection**
