Software Engineering
Lecture and Exercise
Winter Semester 2013/14
Prof. Dr.-Ing. Madjid Fathi
M.Sc. Fazel Ansari

Time: Thursdays 14:00 – 18:00
Begin: November 07, 2013

Registration: Students should register in the first lecture
Room: H-A-8107
Language: English

Topics:

Contents:
What makes a software project succeed? It takes more than a good idea and a team of talented programmers. A project manager needs to know how to guide the team through the entire software project. Software Project Management is the art and science of planning and leading software projects. It requires knowledge of entire software development lifecycle from defining the task to testing the end product.
The goal of this course is to learn and practice Software Project Management and improve the teamwork skills of students through a project work. The course consists of lectures and certain project work containing oral presentation and written report. In this course we provide an introduction to Software Project Management area so that a student particularly Mechatronics and Engineering student can guide a team and run successful software projects.
